

Kumiai Chemical Group Basic Policy on the Environment

1. The Kumiai Chemical Group strives to reduce its environmental impact by establishing and implementing an environmental management system, and making continuous improvements. Officers and employees make concerted efforts to protect the global environment proactively.
2. The Kumiai Chemical Group researches, develops, and produces environmentally friendly products and services and provides them to society. We also promote the development of a recycling-oriented society by using water resources sustainably, conserving resources, and reducing waste.
3. The Kumiai Chemical Group contributes to the realization of a low-carbon society by continuously reducing greenhouse gas emissions, with the aim of mitigating and adapting to global warming.
4. The Kumiai Chemical Group contributes to the realization of a society that coexists with the natural environment by giving consideration to preserving the bounty of nature (the natural environment) and biodiversity.
